## RM of Lipton Well Decommissioning Campaign

DO YOU have a large diameter well that is abandoned or no longer being used? The RM of Lipton along with the **Lower Qu'Appelle Watershed Stewards** (LQWS) are initiating a campaign to decommission abandoned wells. All landowners are eligible (farmers, acreage owners, urban and resort residents).

**All wells decommissioned will have 90% of eligible costs to a maximum payment of \$10,000 per project covered.**

**Please call LQWS at 306.745.9774 before August 15, 2019 to sign up!**

Groundwater is a critical resource in the Lower Qu'Appelle Watershed because over 90% of our residents rely on groundwater for their drinking water. Protection of our aquifers is vital, and one of the best practices to ensure safe source waters throughout our watershed is decommissioning abandoned wells.

Funding for this project is provided through the Ministry of Agriculture Canadian Agriculture Partnership (CAP) program and the RM of Lipton.
